Profile

Computer Science student at Cairo University, ranked among the Top 10 in the faculty. Strong foundation in data structures, algorithms, and problem-solving, with proven experience in software development, design patterns, and competitive programming. Skilled in both individual and collaborative development, with practical experience in web development. Currently seeking an opportunity to kick-start my career and contribute to impactful software solutions.

Education

Faculty of Computers and Artificial Intelligence, Cairo University

- GPA: 3.85 / 4.00.
- Rank: 10th out of 1000+ students.

Problem Solving – Competitive Programming

- Solved 500+ competitive programming problems across Codeforces/LeetCode.
- Ranked as 15 on ECPC Qualification contest between 30+ team of my faculty and 42 between 100+ teams joined to the contest.

Experience

Backend Developer - ASP.NET

06/2025 - Present

Digital Egyptian Pioneers Initiative

- ASP.NET Trainee – Digital Egypt Pioneers Initiative (Round 3) 6-Month Intensive Training Program
Completed a 6-month intensive training program in full-stack web development.
- Completed 200+ hours of intensive training

Skills

Programming Languages

C++, C, Python, Java, SQL, HTML, CSS, JS.

Databases

SQLite, SQL Server.

Tools and Technologies

Git, GitHub

Frameworks

ASP.NET, Django, Spring Boot.

Programming Concepts

OOP, Clean Code, Data Structure, Unit Testing.

Soft Skills

Team Leadership, Problem Solving, Communication, Teamwork, Adaptability.

Projects

Portfolio	08/2025 – 08/2025
• A responsive portfolio website showcasing my full-stack development expertise with modern design principles. Features dark/light mode toggle, project showcases, and interactive elements demonstrating technical proficiency in frontend and backend technologies.	

Learning Management System	11/2024 – 02/2025
• Built a RESTful API with Java, Spring Boot, Spring Security, and MySQL, applying MVC, clean architecture, and domain-driven design. • Implemented key features including JWT authentication, role-based access control, file storage, real-time notifications, and student progress tracking in a team of six. • Engineered the API to support 500+ concurrent users, ensuring scalability and reliable performance.	

Library Website	09/2023 – 02/2024
• Developed a full-stack book management system with Django, Python, and SQLite, featuring CRUD operations, role-based authentication, borrowing/returning, and optimized performance.	

Languages

- Arabic – Mother Tongue.
- English – Working Proficiency.
